

# Yashwi Bhatt

Gandhinagar, Gujarat | [bhattyashwi@gmail.com](mailto:bhattyashwi@gmail.com) | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

## EDUCATION

B.Tech in Computer Science Engineering — LJ University, Ahmedabad  
CGPA: **9.25** (Sem 1) • **9.19** (Sem 2) • **9.83** (Sem 3)

2024 – 2028

## TECHNICAL SKILLS

**Languages:** Java · Python · JavaScript  
**Web & Frameworks:** Django · Node.js · Express.js · React.js · HTML5 · CSS3 · Bootstrap · Tailwind CSS  
**Databases:** MySQL (JDBC) · SQLite · MongoDB · Mongoose  
**Tools:** Git · GitHub · VS Code · Postman · Jupyter Notebook  
**Concepts:** OOP · DSA · REST APIs · DBMS · Agile/Scrum · MERN Stack · Machine Learning (Fundamentals)  
**Problem Solving:** 53 LeetCode problems — 3 Hard · 26 Medium · 24 Easy · 480+ GitHub contributions

## PROJECTS

**SkillLink** — Full-Stack Skill Exchange & Hiring Platform

[github.com/bhattyashwi14/SkillLink](https://github.com/bhattyashwi14/SkillLink)

*Python · Django · SQLite · HTML/CSS · OTP Email Auth · Role-Based Access Control*

- Built a **multi-role platform** (Learner, Tutor, Client) with OTP-based email verification, secure login/logout, and fully separate dashboards per role — each with distinct permissions and workflows.
- Designed a **slot booking system** with automated email confirmations sent to both parties on booking; implemented a post-session rating system that dynamically updates tutor search rankings.
- Integrated a **live-database chatbot** that queries real-time records to help users discover skills, check session status, and navigate the platform — no static FAQ, actual DB queries.
- Implemented a **structured hiring workflow**: clients post skill-based requests, tutors accept/reject with status tracking, managed end-to-end through Django ORM and Admin panel.
- Showcased at **Innovation Village, LJ University**;

**Reflecto** — Console-Based Personal Productivity App

*Java · MySQL · JDBC*

- Architected a **2,470-line modular Java application** with five independent components: Journal, To-Do List, Challenges, Posts, and User Auth — each cleanly separated and interoperable.
- Built **three custom data structures from scratch** — Singly Linked List, Stack (ChallengesStack), and Deque — powering core app logic without relying on Java Collections.
- Engineered a **custom exception framework** (LengthException, DigitException, EmptyDataException) enforcing strict input validation across all user-facing operations.
- Integrated **MySQL via JDBC** using CallableStatement (stored procedures) for all CRUD operations: user sessions, journal entries, to-do management, and challenge tracking.

**Library Management System**

*Java · OOP*

- Console-based system applying inheritance, encapsulation, and polymorphism; modules for Book, Member, and Library with full borrow/return tracking and member management.

## CERTIFICATIONS

- Introduction to Java Programming** — Coursera
- Inheritance and Data Structures in Java** — University of Pennsylvania (Coursera)
- Introduction to HTML, CSS & JavaScript** — IBM (Coursera)
- Agile Scrum in Practice · High Impact Presentations · Email Writing · Time Management** — Infosys Springboard
- Web3 & Rust Foundations** — Arbitrum Builders Lab

## HACKATHONS & EVENTS

- Hackovate** — Hackathon organized by LJ University
- Bit & Build** — Hackathon organized by Google Developer Student Club
- LDCE Hackathon** — Qualified online round
- Innovation Village** — Presented SkillLink to an industry panel at LJ University tech showcase
- Workshops attended:** Devolution (DAIICT, Jan 2025) · JUG-GUJ Java Community Day · HexHunt · Blockchain Workshop — Arbitrum Builders Lab

## INTERESTS

Artificial Intelligence · Competitive Programming · Full-Stack Development · Building Products from Scratch
